REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims address an apparatus, method, and computer program for reconstruction of an image from x-ray projection data where the attenuation density of the object is represented as a sum of predetermined continuous harmonics with unknown coefficients which are then calculated (as shown in independent claims 1, 13, and 16). This feature is neither shown nor fairly suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boas *et al.* US 2003/0190066 A1 shows Green Function use and Levin US 5,546,472 A shows using training images to create basis functions.
